Version 1 - Design

Externalized Configuration

Master

LogStash Scheduler	File System
	nginx.conf
	apache.conf
	foo.conf

1. Configurations are sent from Master to all slaves

Slave 1

Docker

2. Other containers are discovered using the "docker remote api"

LogStash Executor

nginx

foo

3. Log files are streamed from other containers. Which files, and how to parse them is defined in the master config files.

Elastic Search
